C# / .NET Backend Developer with 2 years of enterprise experience building secure, scalable APIs and cloud-deployed microservices for a multi-subsidiary conglomerate (PT Astra International). Proficient in ASP.NET Core Web API, Microsoft SQL Server, and event-driven architectures using message brokers (DotNet.CAP / Rebus). Experienced with Azure Kubernetes Service (AKS) and Azure DevOps (CI/CD) in Agile teams using Jira. Passionate about writing clean, maintainable code and solving complex data integration challenges — aligned with Petrolink's mission of reliable data management in the energy sector.

Pengalaman Kerja

Rapid Teknologi Indonesia - Tangerang, Indonesia

Aug 2024 - Present

Backend Developer

- Designed and built GraphQL and RESTful APIs using ASP.NET Core Web API, serving multiple subsidiaries within PT Astra International's enterprise ecosystem for cross-company data integration.
- Managed application data persistence with Microsoft SQL Server, writing optimized queries and ensuring data integrity for production systems.
- Implemented event-driven communication patterns using DotNet.CAP and Rebus message brokers to decouple services and enable reliable asynchronous data flow across distributed systems.
- Deployed and scaled containerized microservices on Azure Kubernetes Service (AKS), supporting internal deployment workflows; contributed to CI/CD pipelines using Azure DevOps (TFS) for automated builds and deployments.
- Participated in Agile sprint planning and task tracking via Jira; collaborated in code reviews and version control using Git.

Jenjang Pendidikan

Institut Pertanian Bogor - Indonesia

Jul 2019 - Jan 2024

Bachelor of Computer Science, 3.75/4.00

- Finalist – GEMASTIK XV 2022 – National Data Mining Category Selected as a finalist in GEMASTIK (National Student ICT Competition) organized by the Ministry of Education and Culture, representing the university in the data mining category.

Pengalaman organisasi

IEEE IPB - Bogor, Indonesia

Jul 2022 - Jun 2023

Staff

- Built a registration platform for an international IEEE-affiliated event, streamlining sign-up for 50+ people [ASEAN]

Keterampilan, Prestasi & pengalaman lain

- Projects** (2024): Gold Price Forecasting System (Thesis, 2024)

* Built a forecasting Comparable XGBoost, STL decomposition, and Facebook Prophet to predict gold prices.

* Sourced, cleaned, and stored historical time-series data using Microsoft SQL Server, performing data extraction and transformation for model training.

* Engineered features via a sliding-window approach to capture trend and seasonality.

Achieved [MISSING: MAPE/RMSE score] on the test dataset

- Hard Skills:** Backend & API Development:

C#, .NET Core / .NET Framework, ASP.NET Core Web API, GraphQL, RESTful API design

Databases & Data Persistence:

Microsoft SQL Server (production), SQL query writing, relational database design

Messaging & Event-Driven Architecture:

DotNet.CAP (event bus), Rebus (service bus), asynchronous messaging patterns, pub/sub architecture

Cloud & Infrastructure:

Microsoft Azure, Azure Kubernetes Service (AKS), Docker, Azure DevOps (CI/CD pipelines), TFS

Version Control:

Git (intermediate), Azure Repos

Tools & Practices:

Jira, Agile/Scrum, async/await programming, concurrent message processing
